

CARE & MAINTENANCE : FACT SHEET

Spun Polyester Weaved Rope & Neoprene Inner Tubing

Spun Polyester is a thread made up of thin pieces of polyester fabric spun together. The result of this design is a material that looks and feels like cotton, has the strength, weather resistance, and sun resistance of polyester.

Inner neoprene tubing has good anti-aging properties and high tear strength.

Spun Polyester is an easy care fabric that should be cleaned regularly to keep it looking new and fresh.

Use a soft damp cloth to wipe the fabric. A mild soapy water solution may be used for tougher stains.

***Note:** Always use caution when opening boxes and removing the protective materials. Avoid using anything sharp as to not damage the products.
